You are invited to participate in

The Next Generations:
A New Telling of the Japanese American WWII Experience

We Need YOU!

The pool of Nisei elders who can share first-hand experiences from World War II is declining. We are recruiting a new group of sources to speak about our community’s unique history.

NOW is the time for Sansei, Yonsei and Gosei to learn more about the WWII Japanese American experience, collect precious family stories, create a record of your family’s history through the lens of the next generations, and share the lessons of the past with others.

Learn About Our Community's Past and Explore Your Family History

Participate in a workshop series designed to explore and preserve family histories, organized by the TCJACL Education Committee.

Open to all ages and generations at no charge.

Monthly or bi-monthly workshops and meetings conducted via Zoom (will be recorded).

Family history of confinement in concentration camps or WWII military service is not required.

What Participants Will Gain

Since many of our community’s family experiences are rooted within the context of the broader Japanese American WWII experience, Japanese American history will be covered. Resources that can be used in presentations will be provided.

Participants will learn approaches to researching family histories. Japanese translation services, photograph and document scanning, and research assistance will be available.

Participants will learn to use PowerPoint, a slide presentation program that allows users to import photographs, video clips, and text to create a personalized presentation that can be easily modified for the audience.

Participants will learn presentation skills. PowerPoint presentations will be shared in June 2021.

Questions, More Info, and Registration
